TECHNICAL SOLUTION ARCHITECT
E-MOBILITY SOLUTIONS (W/M/D)

APPLICATION DETAILS

inno2fleet

The venture inno2fleet, part of inno2grid and Schneider Electric operates as the "Smart Fleet" competence center and end-to-end fleet electrification provider for our customers in different sectors, industries and fleet types. Our vision is to realize turnkey fleet electrification solutions and build a sustainable future together. Together with Schneider Electric DACH and Schneider Electric Global, we develop, deliver and operate innovative solutions for our end-customers, from consulting to implementation of charging solutions as well as chargepoint operations and digital services.

We are based on the EUREF Campus in Berlin and have excellent opportunities to develop promising products and projects in this environment. We are looking for people with enthusiasm, talent and expertise to join us in managing and optimizing fleet electrification for our large and small customers in the DACH region and beyond.

Job type: Fulltime

Entry date: as of now

Contact person: Jelle Goertz
(Head of Fleet / Venture inno2fleet)

Team: inno2fleet

TIME TO
TAKE THE
RIGHT DECISION

One team, creators, experts, passionate,
self-driven and fun.

YOUR RESPONSIBILITIES & TASKS:

You own and will be an SME on our cloud infrastructure and overarching services.
There is no better skilled and more experienced person in the team than you, in order to further develop our IT setup and create the key tech-elements to scale-up. **Therefore, you would...**

- ...ensure a robust international product rollout.
- ...build fruitful local and global partnerships (tech and digital services).
- ...think and act solution-oriented, dealing with customer requirements.

Shaping, developing, and building on our distributed team will not only be your challenge, but also rewards you personally, as it allows you to take over a key technical role in our start-up.
That thrills down to you:

- Assessing the systems architecture currently in place to recommend and implement improving solutions. This will include understanding the data pipelines and code base of our different products, as well as our deployment.
- Driving and leading architectural design discussions including technical workshops, scoping and solution visualization with Product and Development Team.
- Technically supporting and overviewing activities, that take place during Product ideation, solution design, and implementation.
- Delivering hands-on configuration, development and integration services and serve in a delivery assurance capacity
- Scoping and helping deliver technical pre-sales conversations (Proof of Concept / Proof of Value) around solution architectures, data mapping, integrations, and data migration
- Providing supervision and guidance to development teams
- Tracking and working towards code, testing and technical documentation quality on a leading, overarching level
- Continually researching current and emerging technologies, proposing changes where needed

YOUR PROFILE:

- A strong technical background and many years of professional work experience in at least two IT roles, ideally in Development and IT architecture
- At least three years of practice in cloud-based infrastructures, preferred azure
- A self-reliant and structured way of working, a high degree of solution orientation, and an innovative and entrepreneurial mindset.
- Ability to quickly understand requirements and come up with fit-for-purpose solutions using common patterns or building blocks
- Analytical way of thinking allows you to quickly grasp concepts across diverse business cases and technologies
- Strong communication skills and project management experience to discuss complex topics with stakeholders ranging from product team and engineers to executives
- Familiar with java script and type script, flutter is a plus
- Fluent in English, German is a plus
- Basic E-Mobility know-how

I AM
IN CHARGE
TO CHANGE

Are you ready to change?
Send us your application to:
bewerbung@inno2grid.com

inno2grid as employer:

We are a young team and enjoy developing and implementing holistic, customer-specific solutions, in the field of E-Mobility and Sustainability. We strongly believe the power of dedication, expertise, digitization and automation to be key in building the future of E-Mobility and Energy.
An employment at inno2fleet offers a job in an innovative venture with a high degree of personal development opportunities, the possibility of self-realization in flat hierarchies as well as the prospect of a long-term and diversified professional perspective. We rely on personalities who are characterized by entrepreneurial thinking and acting, a goal- and value-oriented mentality and a passion for new things. In addition to outstanding professional qualifications and competence, inno2grid relies on above-average initiative and responsibility, team spirit, flexibility and willingness to perform.

Whether on the beach volleyball court, in the Venture Lab during the break or at the barbecue, it is important to the team to spend time together not only in the office, even if this is particularly beautifully located on the EUREF Campus.
